The Anaesthetic Awareness Network (UK & Ireland) exists in order to:

- offer support and encouragement to victims of anaesthetic awareness and their families
- share stories and information, where appropriate, for the benefit of victims
- develop a network of patients and professionals who are willing to work together to find effective solutions to the problem of awareness
- campaign nationally and internationally for the benefit of patients, with particular regard to the appropriate after-care of those who have experienced awareness
- act as a catalyst for change, in both public and professional arenas, regarding the availability of technologies for consciousness monitoring during anaesthesia
